

MESSAGE FROM THE EXECUTIVE DIRECTOR

Welcome to the Year 10 Offshore Program

The Year 10 Offshore Program is an academic pathway program that offers students the opportunity to study Queensland's Year 10 curriculum for one year in their home country before completing Year 11 and 12 in a Queensland high school. Students in this program enjoy a high quality educational experience in a supportive and caring learning environment.

The Year 10 Offshore Program has been successfully operating since 1995. During this time the program has helped hundreds of students meet Australian academic entry requirements. The Program has also helped students to develop sound learning, cultural and language skills before making the transition to a Queensland high school.

Students completing the Year 10 Offshore Program are taught in English by registered Australian teachers. This helps them to improve their English proficiency and acquire the necessary skills to achieve academic success in the Queensland curriculum. Our experienced and highly qualified teachers are valued and respected members of the community and are dedicated to helping students become lifelong learners.

I am confident that the Year 10 Offshore Program will provide students with the academic and cultural preparation needed to successfully transition to studying and living in Australia.

Joanne House
Executive Director

Queensland Government Department of Education and Training
(trading as Education Queensland International)
