

EQI – High School Preparation Program Online

Don't miss EQI's innovative online preparation for your Queensland high school journey.

EQI is offering lesson flexibility that encourages and motivates students with extra teacher and student-to-student interaction. Online is an alternative opportunity to learn and practise English from home in a safe environment during Covid-19.

Students are being prepared to confidently commence their enrolment at an EQI high school when travel bans and state borders are open. Successful completion means students will meet EQI's entry requirements and transition through to their chosen school and program.

After Covid-19 restrictions are lifted, our Online HSP graduates can expect to be fast-tracked toward their mainstream school.

Doing HSP Online will almost be like you are here in Queensland practising your English - the lessons are interactive and include physical education, visual art, writing and non-computer based training. Engaging and fun to do, flexible online experiences that allow for student-to-student interaction and collaboration are another opportunity to learn and practise English.

Our focus remains on providing the best outcomes for students, their parents and carers.

Learning online provides an alternative opportunity to managing time which is an added skill for high school.

Easy to use, Microsoft TEAMS is just as effective as face to face study with the added bonus of accessing pre-recorded lesson content.

Students will be part of a balanced program that includes physical activities, relaxation breaks and rest time to maximise learning efficiency.

Parents can look forward to fortnightly information sessions, newsletters and interpreters in addition to regular academic reports advising the progress of their child.

Not only is HSP Online aligned with the National and Queensland high school curriculum, it reflects the approach adopted for EQI's graduate program and provides both beginner and intermediate classes.
