

EQI – Virtual High School Preparation Program

EQIs award winning online program prepares students for their upcoming Queensland high school journey. The Virtual High School Preparation (vHSP) provides the flexibility to learn English at home providing an alternative opportunity to learn and practise English in a safe environment during Covid. The program encourages and motivates with its live teacher-to-student and student-to-student interaction.

Following a successful completion, vHSP students will be fast tracked toward the best matched Queensland government high school once borders re-open.

The focus of vHSP remains the same as our other successful onshore programs - providing the best outcome for academic success. Our online teachers are all qualified in ESL and have all successfully worked in the school environment transitioning students to mainstream classes. At the completion of vHSP you will receive an *End of Term* report.

Learning online provides an additional opportunity to master time-management skills and improve the use of current online platforms such as Microsoft Teams. This will be beneficial not only for high school in Queensland but also for further tertiary studies.

Studying vHSP will be similar to being here in Queensland – there are even new friends to be made. All the lessons are in English and include English for Literature, Mathematics, Science, Humanities and Social Sciences and much more. Students will also be able to participate in elective subjects that range from physical activities, games to technological challenges that will further expand a range of computer skills.

vHSP operates just like school. The timetabled schedule includes lessons, breaks and independent study and is aligned with the National and Queensland high school curriculum.

EQI looks forward to welcoming you to vHSP and the start of your Queensland education journey.
